Ergo-Express® Motorized Platform Cart

Our carts are a safe and efficient way to move heavy materials, equipment, and supplies. The multiple models of the Ergo-Express® Motorized Platform Cart will allow you to fit the best tool to your specific application and budget. Just one staff member can safely perform the same task that currently takes multiple trips and staff. At PHS West, Inc. we take the definition of ergonomics literally in everything we do.

Benefits

Increase your staff efficiency with the ability to transport larger loads in fewer trips and reduce potential staff injuries. Our ergonomic power drive solution for the transport of equipment or supplies can pay for itself in just one year! Whatever your constraints may be (budget, size, capacity, etc.), we work with you to create the perfect solution.

Customizable Options

PHS West, Inc. offers multiple customization options including heavy duty components for heavier loads (battery, motor, controller, etc.). The retractable drive feature allows the drive wheel to lift from the floor letting the cart maneuver in any direction on four swivel casters. A vast array of optional accessories include, but are not limited to: lift tables, cage enclosures, shelving rack assemblies, weatherproof covers, and stainless steel construction.

Ergo-Express® Motorized Platform Cart

PHS West, Inc. does not believe one size fits all. The modular design of our carts allow you to build to your specific requirements. With the Ergo-Express® Motorized Cart, you get exactly what you need, nothing more, nothing less.
