## Capability Statement

Solaire Medical is a hands-on company with a single focus: to produce quality medical storage products that improve healthcare delivery and supply management. Our team of designers, engineers, salespeople and customer service representatives bring decades-long knowledge of medical storage to addressing your needs.

**Core Competencies**

- Small and Large Carts
- Mobile and Stationary Options
- Casework and Cabinets
- High-density designs and compact workstations

**Benefits of Solaire Medical**

- Breadth of Application
- Ease of change and flexibility
- Planning expertise and support
- Custom solutions

**What Sets Solaire Medical Apart**

- Versatile
- Modular
- Durable

Solaire Medical is the one vendor that can offer storage of patient care supplies and medical equipment. Endoscopy departments and Cardiac Cath catheter labs store specific equipment in specific sizes. Other departments, such as surgery, require high-density, highly organized storage designed for specific procedures. Emergency departments call for mobile carts outfitted with a variety of supplies for a variety of treatments. Storage needs vary depending on the frequency or restocking, the amount of space allotted for storage, and security of supplies. And that’s why Solaire Medical offers a variety of healthcare casework, carts, and cabinets for a variety of equipment and supplies. Our medical storage products maximize space and create efficient work areas in all departments of your hospital and throughout outpatient facilities.
