

# Ergo-Express® Power Drive Solutions

Innovation Designed Around You

**PHS  
WEST  
INC.**

“Our material handling solutions provide a compact solution for moving materials and supplies. Just one person can safely perform the same tasks that previously took multiple people.”

-Nate Hendrickson, *Sales and Design Consultant*

## Safe, Efficient Material Handling

Do you have something heavy that needs to be pushed, pulled, lifted, or lowered? Our modular power drive systems can be tailored to meet your exact logistical and ergonomic needs.

## Ergo-Express® Motorized Carts

The array of Ergo-Express® Motorized Carts offer a safe and efficient way to move heavy equipment and supplies. Our ergonomic power drive solution for the transport of materials allows staff the ability to transport larger loads in fewer trips and reduces potential staff injury.

## Ergo-Express® Motorized Tugs

Ergo-Express® Motorized Tugs are a safe and compact solution for moving any heavy, awkward equipment, materials, or supplies when a “hitch, tug and drop” process works best for your logistical flow. With a motorized tugger, one staff member is able to safely perform the same task that previously took multiple staff members or multiple trips.

## PHS West, Inc. Heavy Duty Lifters

The PHS West, Inc. Heavy Duty Lifter is an enhanced lifter for increased capacity. The PHS West, Inc. Heavy Duty Lifter continues the tradition of providing for increased economical, safe, efficient, and ergonomic material handling solutions to assist you with your production needs.

# PHS West, Inc. Power Drive Solutions

## Going Motorized

Our power drive systems are built with a level of modularity, customization, and durability that is unsurpassed by competitors.

- **Carts:** The multiple models of electric carts will allow you to fit the best to your specific application.
- **Tugs:** Our tugs have the smallest footprint of any comparable tugger on the market with a towing capacity of up to 5,000 pounds.
- **Lifters:** The PHS West, Inc. Lifters are completely modular in design; no longer will you need to make a cookie cutter product work for your application. Lift and position any components up to 600 pounds with total accuracy.

## Material Handling

### Ergonomic Benefits

Do your job requirements demand the need to move anything on a horizontal or vertical plane where a motorized pallet jack or forklift simply cannot complete the job? Manual transport requires too many employees and too much time to finish the task at hand. It also presents a safety risk as far as push or pull force injuries. The desire to increase efficiency and safety drives PHS West, Inc. to provide the safe and compact solutions for moving heavy equipment and supplies with a power drive system.

### Motorized Applications

- Motorized Tugs
  - Moving wheeled loads in a train
  - Transport wheeled loads or heavy equipment where dedicated power drive is not possible
  - Any large, heavy items when a forklift or motorized pallet jack cannot do the job
- Motorized Lifters
  - Roll Handling
  - Box Handling
  - Tote Handling
  - Custom Applications
- Motorized Carts
  - Receiving Dock Distribution
  - Material Transport
  - Restocking
  - Order Picking
